

CELEBRATE WITH BUBBLES!

DIY Bubble Recipes

- 4 cups warm water
- 1 cup dish soap (Dawn suggested)
- 2-3 tablespoons glycerin

OR

- 3 cups of warm water
- 4 teaspoons sugar
- 1 cup of dish soap (Dawn suggested)

Stir together gently, using care not to create bubbles when mixing. Also try adding one 0.25oz packet of gelatin for stronger and longer lasting bubbles.

Tip: *The more moisture in the air, the better bubbles will form and last. Hot, dry, summer days are not the best days for blowing bubbles. Try blowing bubbles on a foggy morning.*

SIMPLE AND EASY TO MAKE FOR UPLIFTING FUN!

DIY BUBBLE WAND

- **Plastic cup:** Punch a hole in the bottom of the cup to blow through. Dip the drinking end into the solution.
- **Plastic soft drink bottles:** Cut the bottom off the bottle and dip in the solution. Use the mouth end of the bottle to blow your bubbles. **Tip:** *To create bunches of bubbles, cover the cut opening with a piece of mesh, like the fruit bag used to sell oranges. Use colorful duct tape.*
- **Pipe cleaners:** You can create just about any shape you like. Keep a small section of the pipe cleaner as a handle, or attach it to popsicle sticks or tree twigs from the backyard. **Tip:** *Wrap the pipe cleaner around a small cookie cutter to shape.*
- **Plastic Funnel:** This already has a natural shape for a bubble wand. Dip the large end in the solution, and blow through the small end.

Pledge to Release Bubbles Not Balloons!
